- Welcome
- FIME welcome you to the First International Energy Storage and Conversion Congress
- The energy demand increase each year in Mexico and around the world. The depletion of fossil fuels leads to the necessity of develop novel systems for energy storage and conversion. Furthermore, the technological advances also requires of novel systems of energy storage and conversion to bring autonomy to electric vehicles and modern electronic devices.
- The first aim of the Energy Storage and Conversion Congress is to show and discuss the advances in the field of Electrochemical Capacitors, Batteries, Fuel Cells, Solar Cells and Energy Harvesting. The second aim is to create a link between students, scientists and the industry.
